

AOS Community Commitment

Being a responsible member of our society is an integral part of the AOS mission. As members of the AOS community, we acknowledge that we each play a critical role in the fight against COVID-19 and that personal health and safety is a shared responsibility. In the midst of the pandemic, our success in creating and sustaining a safe environment for our school depends on our commitment to one another. Each AOS family is responsible for taking precautions on campus, at home, and in all aspects of our individual lives to do our part in mitigating the spread of COVID-19.

AOS families, faculty, and staff can help keep our community healthy by being mindful of their actions and following public health and safety protocols. As members of the AOS community, our family pledges to:

- Self-screen and monitor family members for any COVID-19 symptoms.
- Stay home and inform the school if our children or someone in our household is symptomatic.
- Notify the school of any potential exposures, symptoms, or positive COVID-19 test results in a timely manner.
- Limit the size of gatherings in social situations in accordance with public health guidelines.
- Encourage our children to practice social distancing and practice social distancing as a family whenever possible.
- Have our children wear a face covering and wear face coverings as a family, especially when social distancing is not possible or difficult.
- Encourage our children to practice frequent hand-washing and practice frequent hand-washing as a family.
